PRODUCT OF THE MONTH

RICHWOOD

The Richwood Impact Saddle® is the original impact and support unit designed with a full curved trough and easy slide-on, slide-off UHMW wear segments.

Impact Saddle® provide the right support foundation for sealing of dust and fines while protecting load zones from impact. They are available in three duty ratings from light duty to the Magnum Series, which exceeds the CEMA H rating. Impact Saddle® are directly interchangeable with CEMA rollers.

Richwood reviews each application and engineers a solution that provides optimal operating efficiency and real return on investment. Whether the requirement is load zone support or full dust and material containment, Richwood can build a worry-free load zone for you. www.richwood.com
